

# Erasmus+ Summary meeting in Poland

October 10 - 14, 2016

## European possibilities activities:

In preparation for the first meeting, each country was asked to bring job descriptions in the form of a collage. These were given exchanged at the Coordinators meeting.

The first activity by Susanne involved students writing their dream jobs and looking at the various school systems that were presented as a poster on the walls. The students then also discussed in small groups the following:

"what is a school system", " why they have chosen the school they are in", what would the advantages be in working in other European countries and " "how will you prepare yourself to find your dream career".

The second activity was done by Indra and involved learning about "social skills". We did various activities that involved being creative and interacting with all of the students. The activities were challenging and educational, whereby everyone examined their own social abilities. We also had a meeting with the local authorities.

Second teachers also worked on the questionnaires, that were completed by the 30 students of each country. We discussed and got an overview of the questionnaires results.

During the final evening, an evaluation was completed by the various teachers involved in the program.

## Workshops:

- Making food-pierogi's
